AIDEA Teacher Academy

AI-Driven Educators Academy

Newsletter 1

Project at a Glance

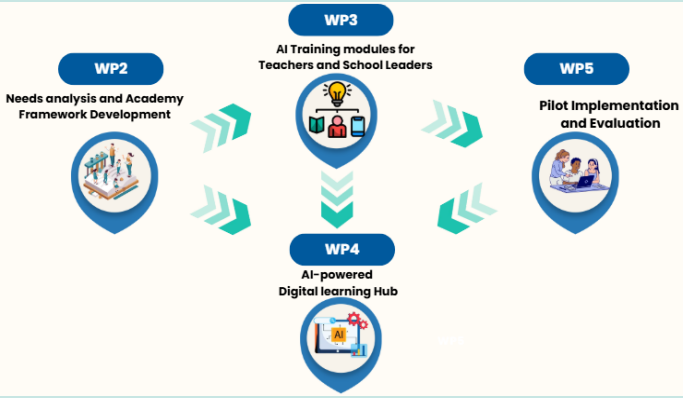
The **AI-Driven Educators Academy (AIDEA)** is a European initiative empowering educators with the skills and ethical foundations to integrate AI into teaching and learning. Bringing together **11 European partners**, AIDEA develops innovative training, AI-powered resources and a European community of AI-competent educators.

From Needs Analysis to Action

AIDEA has completed **WP2 – Needs Analysis and Academy Framework Development**, identifying educators' needs, competence gaps and priorities for AI in education. These findings provide the foundation for the Academy's training, digital resources and implementation activities.

What Comes Next?

Building on the **Needs Analysis and Academy Framework**, AIDEA will develop **AI training and educational resources**, launch an **AI-powered Digital Learning Hub**, and **pilot and evaluate** the approach across Europe to strengthen the Academy.



Events & Trainings

As part of the **European School Innovation Academy (ESIA) 2026**, organised by Ellinogermaniki Agogi (EA), one of the AIDEA project partners, the **AI Horizons in Education** course brought together teachers, school leaders, teacher trainers, and education professionals from across Europe to explore the responsible, ethical, and pedagogically meaningful use of Artificial Intelligence in education.

The **AIDEA project** was presented during the Academy, highlighting its vision and opportunities for educators to strengthen their AI competencies. Teachers showed strong interest, particularly in the project's practical resources for meaningful and responsible AI integration.

Upcoming Conference

Join the AIDEA Workshop at the International Conference "Inspiring Educators to Thrive in the Age of AI"

Educators, researchers, school leaders, and education professionals are invited to participate in the AIDEA workshop at the international conference "Inspiring Educators to Thrive in the Age of AI", organised by EA on 28 November 2026 at the premises of EA School, Athens, Greece.

Through the **AIDEA workshop**, participants will explore the project's approach to **AI literacy, responsible AI use, and educators' competencies** through discussion and exchange.

Date: 28 November 2026

Venue: Ellinogermaniki Agogi School, Athens
